

Discover the 'Non-Stick' World Of Ritec ClearShield®

... upgrades ordinary glass to –

- 'non-stick' easy-clean
- energy-saving
- light-enhancing
- microbe-resistant

How it works

Working just like 'non-stick' cookware, **ClearShield®** - the protective element of the award-winning **ClearShield Eco-System™** - acts as a durable protective barrier on the surface of the glass, upgrading existing glass to **ClearShield Eco-Glass™**. This superior type of glass stops limescale, moisture, alkalinity and dirt from bonding with the glass. It is the unique answer to Problem Glass!

ClearShield®...

- is completely transparent, chemically inert, non-hazardous and UV stable
- forms a chemical bond with the glass so will never peel, flake or crack
- is applied by specially trained staff on new glass and also on old glass that is stained or discoloured
- is independently proven to possess anti-microbial properties

Benefits

For architects and specifiers...

- Protects glass from contamination during construction
- Helps to handover completed glass façade buildings in pristine condition
- Reduces client's on-going cleaning and maintenance costs
- Adds value to prestigious projects
- Projects a positive brand image
- Specifying ClearShield® contributes to the 'Green Building' initiative by reducing significantly the use of water and harsh cleaning chemicals

For glass manufacturers, installers & fabricators...

- Helps increase sales and profits by offering customers an added value solution
- Helps diversify in a stagnant market without capital investment
- Unique renovation solutions for already installed glass

For end users...

- Pristine appearance of glass and reduction in growth of bacteria
- Always easier to clean and keep clean
- Significant savings on maintenance costs of glass
- Reduces frequency of cleaning by 50% on average
- Resists staining and discolouration

Application versatility

ClearShield® is versatile to use...

- in your own factory or workshop
- on already installed glass

We have a range of application solutions for all kinds of glass, interior and exterior, regardless of volume.

Market sectors

ClearShield® is successfully used to protect all glass surfaces, including...

- building façades
- solar thermal and photovoltaic panels
- commercial glazing
- marine glass
- shower doors and enclosures
- domestic windows and doors
- decorative / sandblasted glass
- automotive glass
- kitchen splashbacks and worktops
- glass furniture and mirrors
